I Mustajab Ali (Naam toh suna hy hoga) with my amazing talented most gorgeous co host Aroob Zafar.

Welcome, everyone, to the annual dinner of our beloved computer science department! It's great to see so many bright minds gathered here today, ready to celebrate our shared passion for all things tech.

As we all know, computer science can be a challenging field. We spend hours staring at screens, trying to solve problems that seem unsolvable.

But you know what they say: "If at first you don't succeed, call it version 1.0."

As we gather here tonight, we reflect on the many accomplishments of the past year

But tonight, is not just about looking back. It's also about looking forward, to the opportunities and challenges that lie ahead.

So let's take a moment to recognize the hard work and dedication of our students, faculty members, and staff. Without your tireless efforts, our dept would not be the vibrant, dynamic institution that it is today.
